Reports to	Workshop Operations Manager	**Location**	On site in Dubai, at the pilot workshops
Employment	Full time, shift-based including evenings and weekends, UAE employment contract	**Start**	Ahead of the first pilot workshop opening (about 9 months after our Seed round closes)

About Auxionetics

Auxionetics Artificial Intelligence L.L.C S.O.C is an IP-led robotics company in Dubai. Our patent-pending technology aims to let people and robots work safely side by side, and its first use will be the Smart Robot Mechanic: a car-service bay in which two collaborative arms will take on the repetitive, physically demanding work while a skilled technician stays in charge of every job. Six US patent applications and an international (PCT) application have been filed. We will run our own workshops in Dubai and license our Human-Robot Collaboration platform once it runs reliably in daily operation.

Why this role matters

On every shift, one person is in charge of the robots and the people working beside them. You will run the shift: supervise the bays, approve each job's key steps, take over when a technician is needed, and make sure every car leaves serviced correctly and safely.

What you will own

- **Shift command.** Lead the shift team; start up, run and shut down the bays to procedure.
- **Supervision.** Monitor every job from the technician console; approve steps, pause or take over when required.
- **Safety.** Enforce bay access, lockout and emergency procedures; stop work whenever safety is in doubt.
- **Quality.** Check that every service meets its sign-off criteria before the car is released.
- **Exceptions.** Decide what is handed to a technician or refused, and record why.
- **Hand-over.** Run clear shift hand-overs and report faults, delays and incidents.

Minimum qualifications

- 5+ years in automotive service, including at least 2 leading a team or shift.
- Comfortable with computer-based equipment and learning new technology.
- A strong safety record and calm decision-making under pressure.
- Clear spoken and written English.

Preferred qualifications

- Experience with automated or robotic equipment.
- Quick-lube, tire-chain or dealer service experience.
- Arabic.
- A first-aid certificate.

Your first year

By	What success looks like
Training	Completed robot operation, safety and supervision training on the first bay before opening.
3 months open	Shifts run to procedure, with every job recorded and signed off.
12 months	Shift targets for throughput, quality and safety met consistently; new crew members trained by you.

How we work

- **Safety first.** Nobody enters a working bay without the right training; every job follows a documented safety procedure.
- **Measured, not claimed.** Every job is recorded, so we know what works and fix what does not.
- **One team.** Robots do the repetitive work; people stay in charge, and every voice on the shift counts.

What we offer

- A founding place in a new kind of vehicle service in Dubai, with training on robotic equipment that few workshops in the world use today.
- A competitive salary; company-paid visa, work permit and health insurance; annual leave and end-of-service gratuity under UAE law.

Conditions. Every offer is conditional on the close of our Seed round, satisfactory checks, a UAE work permit, and an agreement assigning to the company the IP created in employment.

> **How to apply.** Email your CV and a short note on the teams and shifts you have led to careers@auxionetics.com, quoting AUX-SITE-SD-01. Shortlisted candidates will have an interview and a practical assessment with the Workshop Operations Manager. CVs are used only for recruitment and deleted within 12 months unless the candidate joins us. **Auxionetics is an equal-opportunity employer** and selects on merit alone.
