Automotive Service Technician

Inspection, Exceptions and Quality Sign-Off · Founding Team 2027 · AUX-SITE-SD-03

Reference	AUX-SITE-SD-03	**Level**	Technician, 3+ years
Reports to	Robot Supervisor	**Location**	On site in Dubai, at the pilot workshops
Employment	Full time, shift-based including evenings and weekends, UAE employment contract	**Start**	Ahead of the first pilot workshop opening (about 9 months after our Seed round closes)

About Auxionetics

Auxionetics Artificial Intelligence L.L.C S.O.C is an IP-led robotics company in Dubai. Our patent-pending technology aims to let people and robots work safely side by side, and its first use will be the Smart Robot Mechanic: a car-service bay in which two collaborative arms will take on the repetitive, physically demanding work while a skilled technician stays in charge of every job. Six US patent applications and an international (PCT) application have been filed. We will run our own workshops in Dubai and license our Human-Robot Collaboration platform once it runs reliably in daily operation.

Why this role matters

Robots will do the repetitive work; you will bring the judgment. You will inspect each car as it arrives, handle the jobs the robot hands back, and sign off the quality of every service before the car leaves.

What you will own

- **Check-in inspection.** Inspect each vehicle on arrival: fluids, leaks, tires, damage and anything that needs a human decision.
- **Exceptions.** Complete the tasks the bay hands back, such as seized fasteners, non-standard parts or extra work.
- **Quality sign-off.** Verify fluid levels, torques and tire pressures before release, to the checklist.
- **Advice.** Explain findings clearly to the Service Advisor and, when needed, to the customer.
- **Safety.** Follow bay access and lockout procedures at all times.
- **Feedback.** Report recurring issues so procedures and vehicle data improve.

Minimum qualifications

- A recognized automotive technician qualification.
- 3+ years in a UAE workshop on oil, filter, tire and routine maintenance.
- Sound knowledge of torque specifications and safe lifting practice.
- Clear spoken English.

Preferred qualifications

- Manufacturer certification.
- EV or hybrid service training.
- Arabic.
- Experience with digital job cards.

Your first year

By	What success looks like
Training	Completed safety and bay training before opening.
3 months open	Every car inspected and signed off to the checklist.
12 months	First-time quality at target, with exceptions resolved quickly.

How we work

- **Safety first.** Nobody enters a working bay without the right training; every job follows a documented safety procedure.
- **Measured, not claimed.** Every job is recorded, so we know what works and fix what does not.
- **One team.** Robots do the repetitive work; people stay in charge, and every voice on the shift counts.

What we offer

- A founding place in a new kind of vehicle service in Dubai, with training on robotic equipment that few workshops in the world use today.
- A competitive salary; company-paid visa, work permit and health insurance; annual leave and end-of-service gratuity under UAE law.

Conditions. Every offer is conditional on the close of our Seed round, satisfactory checks, a UAE work permit, and an agreement assigning to the company the IP created in employment.

> **How to apply.** Email your CV and a short note on your workshop experience to careers@auxionetics.com, quoting AUX-SITE-SD-03. Shortlisted candidates will have an interview and a practical skills test with the Workshop Operations Manager. CVs are used only for recruitment and deleted within 12 months unless the candidate joins us. **Auxionetics is an equal-opportunity employer** and selects on merit alone.
